# Press Release

## **H.E.A.R.T. Seminar 2018**

Healthcare Everyone Access Remotely with Telemedicine

**Lithonia, GA, March 28, 2018:**

**For Release 8AM EST on April 11, 2018:**

Butterfly Journey Ministries is holding the first annual **H.E.A.R.T. Seminar 2018** at **Stonecrest Library (Meeting Room), 3123 Klondike Road, Lithonia, GA 30038 on May 9, 2018 from 1PM to 3PM and Golden Corral (Meeting Room), 1350 Hwy. 138 NE, Conyers, GA 30013 on May 10, 2018 from 1PM to 3PM** for physicians, advance nurse practitioners, nurses, healthcare workers, and caregivers to come learn and ask questions concerning infrastructure, creating, developing and using Telemedicine and Telehealth services. The purpose of the H.E.A.R.T. Seminar 2018 is a free community event of bringing awareness, education, and knowledge sharing about the importance of Telehealth and Telemedicine to the community. Scheduled speakers for the H.E.A.R.T. Seminar 2018 are Councilwoman Dr. Diane Daniels Adoma for City of Stonecrest District 5, Ed Honeycutt the Account Manager with Global Partnership for Telehealth, Dr. Marion J. Maloof, D.C., B.C.A.O with Maloof Family Chiropractic, Demetrius McCoy the Chief of Staff for Commissioner Mereda Davis Johnson of DeKalb County District 5, and Lloyd Simons the Director of Southeastern Telehealth Resource Center (SETRC).

Healthcare is increasingly changing to include more electronic and distant care and treatment for people with various physical and mental diseases. From urban to rural communities, telemedicine may bring another quality of healthcare for individuals with limited resources to travel long distances for medical care. Have you ever wondered how you could provide treatment for your patients through telemedicine? What financial investment and infrastructure medical professionals need to create telemedicine services for clients? How does the patient view telemedicine services for healthcare? What are the best telemedicine methods for a physician or nurse practitioner to use with patients? What are the major differences between telemedicine and telehealth? What are the challenges of implementing telemedicine and how to overcome them? What new and innovative telemedicine care used in hospitals and medical offices? What are ways caregivers may dispel telemedicine fears while caring for loved one?

Center for Connected Health Policy (2018) indicates "Telehealth encompasses a broad variety of technologies and tactics to deliver virtual medical, health, and education services. Telehealth is not a specific service, but a collection of means to enhance care and education delivery."

Global Partnership for Telehealth (2018) mentions “Our unparalleled success in the United States in applied telehealth programs and services has assisted agencies in providing cost effective, efficient, and high quality healthcare to hundreds of thousands. Global Partnership for Telehealth is reaching beyond our borders to bring healthcare to the world.”

Southeastern Telehealth Resource Center (2018) explains their goals have been “...complementary to the activities of the telemedicine programs in the Southeast in that the SETRC provides the basis for widespread application of educational and clinical support services and technical advances that have been studied as well as validated at the Georgia Partnership for Telehealth (GPT) and its partner sites.”
